|-----------|--|
| Student   |  |
| Student   |  |

#### COSTs/EXPENSES FORECASTING/JUSTIFICATION:

- \*previous data of your own company
- \*analogy (based on the competitors)
- \*based on the industry standards/ ratios
- \*expert opinion
- \*primary data request to the performer organization
- \*secondary data, i.e. internet sources

#### MARKETING PLAN / MARKETING MIX TOOLS

- "Price" revenue generating tool
  - \*Can be calculated separately for each Product Item from the Product Portfolio (Price 1 for Product 1, Price 2 for Product 2, etc.)
- "Product" for example, new product development, design, brand management\*
  - o such as analysis of customer feedback, or R&D
  - o pre-testing of new features
  - o corporate branding
    - \*both as initial investment and period costs
- "Promotion" advertising budget, public relationships, or other Expenses
  - o <u>Discounts</u> if applied as a sales promotion
  - o Promotion <u>materials</u> if applied, printed materials, or banner design, etc.
  - o Customer service
- "Place" costs for example, such expenses as:
  - o commission for OTA and traditional travel agencies
  - o delivery and logistics, etc.

## **OPERATIONAL PLAN**

- HRM → salaries,
  - but also hiring process related costs (how will you advertise your job positions?), training and development costs, bonuses, benefits (holidays, insurances, gym or working computer)
  - o Salary related TAX
- Suppliers → purchase of raw materials
- Processes → Maintenance, should be demonstrated as costs, for example, quality control, planned security controls of buildings, changing of the broken furniture, revenue of domain name and hosting for website
- Etc.

## NOTES.

- Costs should be grouped by fixed and variable to calculate BEP further
- o Costs should be grouped by the periods (monthly, quarterly, yearly) to place in correct column in table Financial Plan
- All prices (for customer and for company) should include VAT input (what company gets with revenues) and VAT output (what company pays, for example, with purchase for raw materials)
- o First year should be planned by month, further calculations can be grouped by years.
- O Check that all the numbers are related with the business plan document. Financial plan is representation of your decisions done but with numbers.

#### ECONOMIC AND FINANCIAL VIABILITY

## Checklist Financial Plan (see Appendix for example of tables)

- Key assumptions
  - o if you make any generalization of the numbers (we consider average check for the calculations of the restaurant's revenue,
  - we do not include demonstrate seasonality in the financial table and take occupancy rate as average per year)
  - or if do not take into consideration some issues (for the calculation we consider optimistic sales forecast, we do not take into consideration inflation, we do not consider any changes of the taxes, or the minimum salary ranges)
  - $\circ$  etc
- *Investment plan* initial investments (furniture, initial hiring employees, website development, logo design, etc.)
  - o do not forget legal part (registration of the new company)
- Financial Statements (12-month for Year 1, Year 2, Year 3)
  - o *Income statement* (Profit&Loss statement) (with Gross margin, or with Contribution margin)
    - NOTE! Do not forget to add the VAT payments to government (VAT output-VAT input)
    - Income TAX
    - Salary TAX
  - o *Balance sheet* pro-forma balance sheet
  - o *Cash flow statement* (you should demonstrate the first month when you will get a positive Income, and the year of return of initial investments).
- Detailed BEP (break-even point) analysis
  - BEP in dollars/euro
  - BEP in number of sales
- Analysis of the economic viability of the project
  - Ration analysis with the comparison to the industry standards (per Year 1, Year 2, Year 3 and +industry standard column):
    - *Profitability*, % (net sales vs. net profit)
    - *ROI*, % (total investments vs. net profit)
    - Contribution margin, % (proportions on fixed vs. variable costs)
  - Additional industry ration comparison:
    - % of marketing spending
    - Occupancy rate
    - Turnover

# Appendix – Examples of Tables

Table 19 - Initial Investments
